- ♥ **Key words** Deeper grounding. Grounds your Holy Womb Chakra to enable you to manifest the full potential of your Divine Self.

We have far more chakras than the seven main ones that we usually focus on. Chakras are spinning energy centres that pull in life force, also known as prana. E.g., your meridians (energy pathways) flow along countless tiny spinning points. What is less known is that we also have chakras above and below our physical body. The more we progress along our path of spiritual development, the closer we come to activating these dormant wheels of light – one by one, each at the appropriate time.

The Earth Star

We all have a chakra situated below our feet, in line with our central channel, at about 60 centimetres (2 feet) to 1 meter (3.3 feet) below the Earth's surface, called The Earth Star. Alignment with this energy centre is important for our physical grounding. It helps us feel safe on this planet we call home.

The Mother Star

Deeper down, at about 30 meters (98.5 feet) below the surface of the Earth, we have a dormant chakra, called The Mother Star. When we advance on the spiritual path, this energy wheel can be activated to provide us with deeper grounding. Feeling attracted to the essence vibration 'Magdala' is a sign that your system is ready for this new phase on your path.

Awakening The Magdalene Within

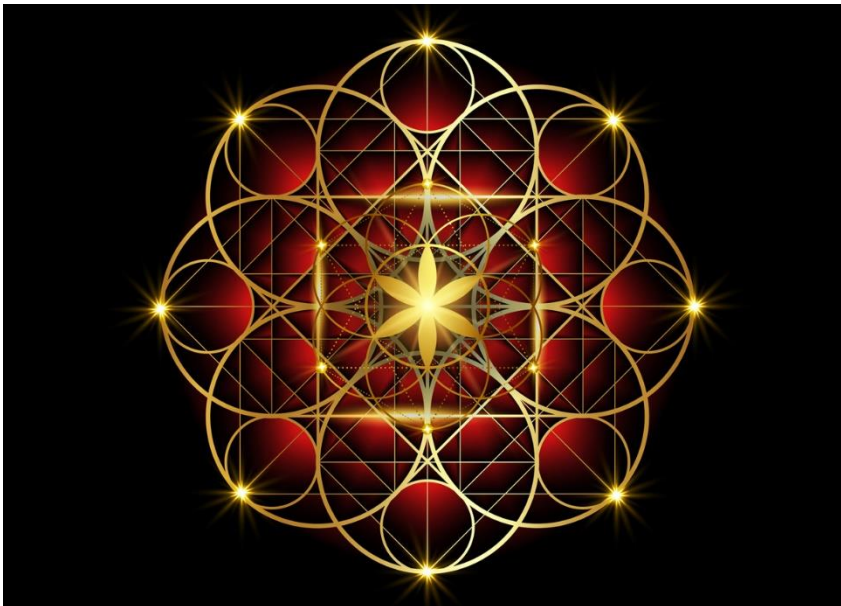

A strong connection between our Holy Womb Chakra (our manifestation centre) and The Mother Star is essential on the spiritual journey called *Awakening The Magdalene Within*.

This path allows you to grow to a whole new level of inner womanhood – and this applies to all genders.

The Magdala, or The Magdalene Within, is the template of the Mother Goddess dormant in every person, waiting to be activated at the right time. Once ignited, this sacred and secret Divine Feminine Vessel for Pure Unconditional Love, will gradually start to serve the world with the Ultimate Unconditional Love from The Mother of All That Is. This ever so nurturing Divine Love will silently bless all humans, animals and plants as you encounter them on your path.

In order to activate The Magdalene Within, the hidden and holy pathways in your vessel need to be awakened. One of these is the sacred energy connection between your Holy Womb Chakra and The Mother Star.

Igniting The Mother Star

The Magdala essence is an initiating vibration. It aligns your Holy Womb Chakra (and uterus* if you have one) with The Mother Star. Once the two are aligned, they bond and this then ignites The Mother Star's function. This sacred chakra deep below your feet then becomes part of your expanded energy system. Gradually, The Mother Star:

1) *Brings your grounding to the next level*

It provides your manifestation centre with the necessary grounding for the next steps on your spiritual path.

2) *Stimulates the purification of your Holy Womb Chakra*

Energetic remnants of emotional pain or physical trauma in your manifestation centre – whether from this lifetime, previous ones or inherited from ancestors – will be filtered out.

3) Strengthens your Holy Womb Chakra

This allows your manifestation centre to radiate with all its might, enabling you to manifest your divine self to full potential. You will know exactly how to express Your Love on Earth.

4) Raises your connection with the feminine forces and their qualities within you

For you to become whole.

5) Provides you with a profound connection with the Universal Wisdom of The Mother of All That Is

For you to become at one with All That Is.

Over time, the connection between your manifestation centre and The Mother Star will become stronger and steadier, until it has established itself fully. At that point you will find that the connection with The Mother Goddess, the primordial mother, has become a natural part of you, instead of a theoretical concept. Naturally, you will live the Divine Feminine in the way it seeks to be expressed.

You may repeat the Magdala essence as often as you wish to establish thorough grounding and a profound connection with the Universal Wisdom of The Mother of All That Is.

A town called Magdala

The high-vibrational essence of Magdala was gifted on the excavations of a first century synagogue dating to before the year 70, when the Second Temple in Jerusalem was destroyed. The synagogue is located where the town of Magdala used to stand. Here, in 2009, archaeologists unearthed a stunning carved stone block with sacred depictions such as the Flower of Life symbol. The

stone stood at the centre of the synagogue and is tall enough to have been used as a reading desk or podium by someone in a seated position. It is approximately 60 centimetres (2 feet) long, circa 50cm (1.7 feet) wide and stands 40cm (18 in) high. After its discovery, it soon became known as the Magdala Stone.

During the first century, Magdala's most important economic activity was fishing as it had a port on Lake Galilee. It was in those days that a woman from this town became intrigued by a travelling man called Yeshua. She decided to follow him along the shores of Lake Galilee. Her name was Mary, Mary from Magdala. Twenty centuries later she is still known as Mary Magdalene.

The essence called Magdala, not only provides you with deeper grounding. It contains *the essence of Magdala*, the 1st century fishermen's town where it was gifted, and thus connects you deeply with the magic of this place.
